# Reimagining the BlueDot Observatory Visualization

A Critical and Creative Redesign for Better Data Clarity

This Project aims to redesign AWS' BlueDot Observatory Visualization particularly focusing on understanding. Unlike the original, which requires the viewer to read a lot of background information, this redesign focuses on clarity and allows them to receive the same message BlueDot tries to send directly from the labels.

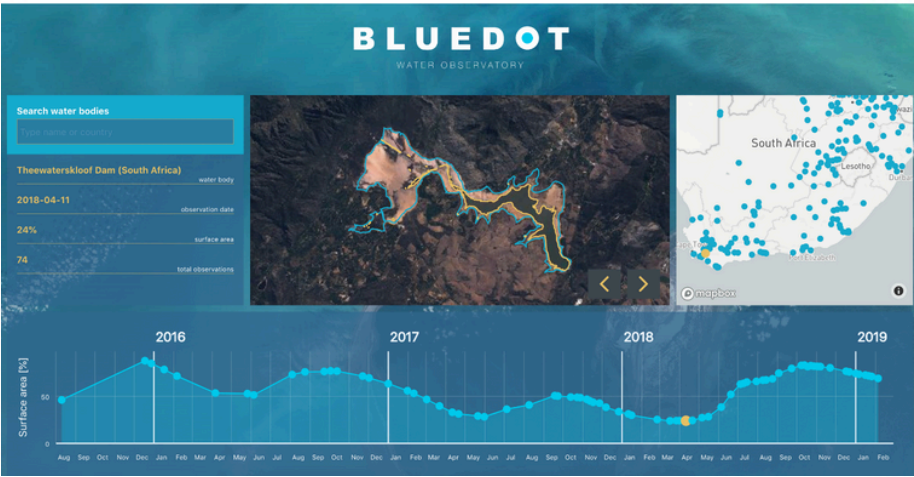

QuickSight: Benefits & Limitations

Benefits:
- strong data security and integration with AWS
- Clear and scalable visual outputs
- accessible for non-technical users

Limitations:
- Limited customization compared to more flexible tools
- dependent on amazon to keep online
- paid service
